

NINTH REPORT

OF THE

ROYAL UNIVERSITY

OF

IRELAND

(FOR 1890.)

Presented to both Houses of Parliament by Command of Her Majesty.

DUBLIN:

PRINTED FOR HER MAJESTY'S STATIONERY OFFICE,
By ALEXANDER THOM & Co. (LIMITED), ABBEY-STREET.

And to be purchased, either directly or through any Bookseller, from
HODGES, FIGGIS, & Co., 104, GRAFTON-STREET, DUBLIN; or
ETRE & SPOTTISWOODE, EAST HARDING-STREET, FLEET-STREET, E.C.; or
JOHN MENZIES & Co., 12, HANOVER-STREET, EDINBURGH, and
88 and 90, WEST NILE-STREET, GLASGOW.

1891.

[C.—6339.] Price 1d.

DUBLIN CASTLE,
15th April, 1891.

No. 10,508.

GENTLEMEN,

I have to acknowledge the receipt of your letter of the 13th instant, forwarding, for submission to His Excellency the Lord Lieutenant, the Annual Report for the year 1890, on the condition and progress of the Royal University.

I am, Gentlemen,

Your obedient Servant,

W. S. B. KAYE.

The Secretaries,
Royal University,
Earlsfort-terrace.

NINTH REPORT OF THE ROYAL UNIVERSITY OF IRELAND.

TO HIS EXCELLENCY LAWRENCE, EARL OF ZETLAND,
K.P., &c. &c.

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

ROYAL UNIVERSITY OF IRELAND,
March 31, 1891.

MAY IT PLEASE YOUR EXCELLENCY,

I have the honour to submit the Annual Report on the condition and progress of the University.

The total number of persons who entered for the various Academical Examinations of the University during the year 1890, was 2,845; while in the previous year 2,970 entered.

The number of candidates who absented themselves this year was much less than in 1889, and the number who passed the several examinations was greater both absolutely and relatively, being 1,803 in 1890, as against 1,625 in 1889.

The Appendix to this Report contains Tables giving all important details connected with the Examinations held in 1890, for both male and female candidates. A Table is also given showing the Academic progress, in the various Faculties, made by Students matriculated in 1881 to 1889 inclusive.

At the time of forwarding my last Report two vacancies existed on the Senate; one of these vacancies has since been filled up by the appointment of John Robinson Leebody, D.Sc., the other remains vacant. I regret to have to report that two vacancies have occurred this year on the Senate, one by the death of W. K. Sullivan, D.Sc., President of Queen's College, Cork, the other by the resignation of the Most Rev. Bishop Woodlock, D.D.; one of these vacancies has been filled up by the appointment of James Slattery, M.A., President of Queen's College, Cork.

There were two public meetings of the University in 1890. The first was of a formal character, and was held on the 21st day of May, for the purpose mainly of admitting to their degrees the candidates who had passed at the Medical Examinations held a short time previously.

The usual annual meeting of the University to confer degrees in the several faculties, and to declare the distinctions obtained

by candidates at the Honour Examinations, was held on 29th October.

During the past year the Senate have continued to add gradually to the Library. They have added also to their collection of Natural History specimens, and the expenditure of a small sum for their preservation has been sanctioned by the Treasury.

I think it right to call your Excellency's attention to a point which I have already brought under the notice of more than one of your predecessors. When, ten years ago, Her Majesty's Government settled the amount of Endowment which they ought to recommend Parliament to provide for the new Royal University, careful inquiries led them to believe that the largest number of candidates likely at any time to present themselves for its examinations could not exceed 2,100. The actual number has never been so low as this; and in the year just closed the number of persons actually examined was 2,700.

It is obvious that a sum of money sufficient to meet all reasonable expenses connected with a system of examinations for a certain number of students must be inadequate when the number is very considerably increased. Besides the constant development of the natural sciences adds largely to the expense of examinations.

In conformity with the provisions of the Act of Parliament, 44 and 45 Vic., chap. 52, the accounts of the receipts and expenditure of the University, with the corresponding vouchers and other documents, are rendered quarterly to the Controller and Auditor-General, who submits an annual report and abstract to Parliament.

I have the honour to be

Your Excellency's faithful and obedient servant,

EMLY.

APPENDIX II.

NINTH ANNUAL MEETING OF THE ROYAL UNIVERSITY OF IRELAND.

OCTOBER 29TH, 1890.

Ninth Annual Meeting of the University was held on October 29th, 1890.

The Right Hon. John Thomas Ball, LL.D., acting as Pro Vice-Chancellor of the University opened the proceedings with the following address :—

My Lords, Ladies, and Gentlemen,—in consequence of the absence of the Chancellor and the Vice-Chancellor—in both cases from unavoidable causes—the duty devolves upon me of presiding at this our annual meeting for the purpose of conferring degrees. It has been usual on such occasions for the person fulfilling this duty to advert briefly to the existing position of the University.

We have now been for ten years an incorporated institution by the name of the Royal University of Ireland. We are, it is to be noted, a University, not a college. We examine; we do not teach. We ascertain the educational progress resulting from the teaching in colleges or from private study, and reward proficiency with degrees, honours, and prizes. Since we do not teach, in order to keep up a supply of students for our examinations, the existence of colleges is indispensable; and accordingly there are four colleges from which come much the greater number of the young persons who here present themselves. These colleges are the three Queen's Colleges of Belfast, Cork, and Galway, and the University College in St. Stephen's-green, Dublin. In this enumeration I have inadvertently omitted the Magee College. The first three, endowed by the State, have long since attained high reputation. The fourth, unfortunately as yet unendowed, and struggling against the difficulties caused by narrow means, is rapidly acquiring similar excellence. The Magee College also advances, struggling against inadequate endowment.

In its constitution our University resembles the London. Both aim at the same object—not to build up great storehouses of learning within themselves, a duty assigned to and admirably discharged by the great older Universities—but by the incitement of examinations and rewards to stimulate the acquisition and diffusion of higher knowledge amongst the classes of the community who need its guidance for the discharge of the duties arising from their station.

The minute details of the systems of these two sister Universities, wherever it is that they differ from those of others, would lead too far. But there is one peculiarity common to both, too important to admit of being passed in silence. In both female students are permitted to present themselves for examination. In both they can compete for honours, prizes, and exhibitions, and are entitled to obtain degrees.

The effect of this has been, as might be anticipated, both in England and Ireland, to raise, generally, the standard of female education, a result of which it needs little reflection to see the value. The earliest impressions are the deepest and most lasting. These come from the mother. Of what importance to make those who impart those im-

pressions worthy of their office. Opinion is formed by conversation, and the tone of conversation is largely affected by the influence of educated women. Of what importance, then, must it be to instruct and guide this influence. Remember that when women have knowledge, men will be ashamed of ignorance. How capable women are of serious study, the records of this University, short as they are, testify. In every department of knowledge they have obtained honours—in classics, in modern languages and literature, in mental and moral science, even in mathematics, and its kindred sciences. This day I shall confer a degree upon a lady, Miss Robertson, whose name you have heard as having obtained in Experimental Physics the highest prize we give, a studentship of £100 a year for three years.

It is unnecessary to refer to the distinctions of women in the arts which refine and embellish life. In these, women, from instinctive tendencies, and in this University incited by the example of the Princess of Wales, who accepted and attended personally to receive our degree of Doctor of Music, might be expected to excel. I rather desire to congratulate you upon the fact that the great labours and anxieties connected with the medical profession and with surgery have not deterred our female students from those subjects. A lady on whom I this year conferred all the medical degrees, Miss Fleury, was ranked at the examination in the very highest class of honours in those subjects. She has since enrolled herself in that noble band which, to the honour of her sex, ministers to disease and suffering either in our own hospitals or in the Eastern world where, but for them, so many must perish miserably for want of adequate professional aid. But however interesting may be these considerations, we are to-day more immediately concerned with the results than the nature of our system. What account have we, who preside over its development and working, to render of its progress? First, as to numbers, we show you a substantial growth from 2,364 students presenting themselves for examination in 1884, of whom 131 were women, to 2,845 presenting themselves in 1890, of whom 365 were women. Secondly, we are able to announce that there has been a decided advance in the degree of knowledge attained by those students; so that we have felt ourselves justified in requiring that merit shall be tested with increased severity. Taking the average of answering at the present examinations, it must be pronounced that it has been in the highest degree satisfactory.

I claim, therefore, for the Senate of this University that—representative of every variety of thought upon the great subjects that interest men's minds, lifted above ephemeral quarrels and controversies, observing and following, but not in a servile spirit of imitation, those who have gone before us—they have so framed their measures and so conducted their administration that the result has been a degree of success which may be proudly compared with the record of any other academic institution in a space of time similar to that for which the Royal University has existed.

Dr. J. Creed Meredith, one of the Secretaries of the University, then read the list of successful candidates for Degrees, and as the names of the candidates were called they were presented by Dr. Dunne, the other Secretary, to the Pro Vice-Chancellor, and were admitted by him to their respective Degrees.
